Art Unit:

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10,13-16, drawn to measuring the thickness of a wafer, classified in class 451, subclass 6.
  - II. Claims 11,12, drawn to a method of placing a wafer in water, classified in class 437, subclass 984.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions modes of operation, Group I measuring a thickness of a wafer and Group II- placing wafer into water without bubbles.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Gunnison on September 16, 1996 to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit:

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eileen Morgan whose telephone number is (703) 308-1743.
